

Driving Success in Dermatology Drug Development

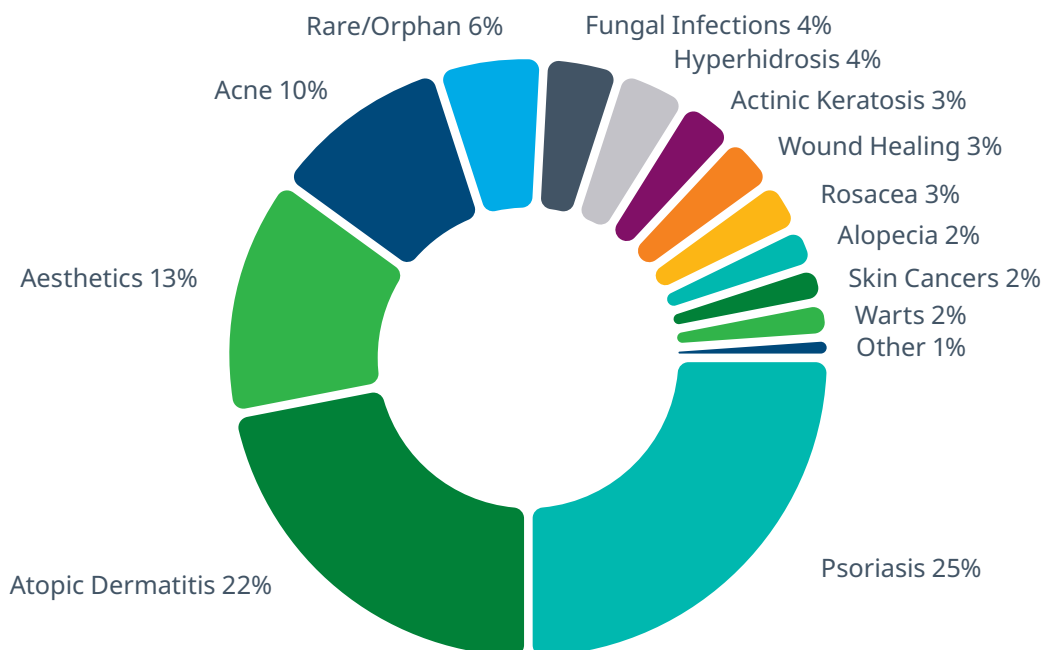

Dedicated clinical teams with 25 years' experience in dermatology

You require a clinical development partner with deep dermatology expertise and meaningful relationships with key sites around the globe. Our dedicated teams are led by in-house, board-certified dermatologists and have decades of experience conducting early and late phase studies for dermatologic conditions and aesthetics.

We apply scientific, medical and operational expertise coupled with data-driven methods and tools for realistic strategic planning which allows for more precise predictive models to complete studies on time and on budget.

Experience by Indication

CORE-Powered Clinical Development

Using the IQVIA CORE™, we can integrate data, analytics, technology, and therapeutic expertise around the specific requirements of your trial. This allows us to deliver trials – from study design through delivery – with precision and speed.

Trial Design

Integrate **real world patient data** into your evidence plan

Validate protocols with real world insights to reduce amendments

Site Selection

Predict the best performing sites for your study

Look beyond the known investigator pool

Identify the right sites, faster

Recruitment

Empower CRAs with **site-level enrollment forecasts** based on real world dynamics

Mobilize referral networks around sites

Execution

Increase patient safety through early signal detection

Automate workflows based on end-to-end risk detection

200+ DERMATOLOGY STUDIES

43,500+ PATIENTS

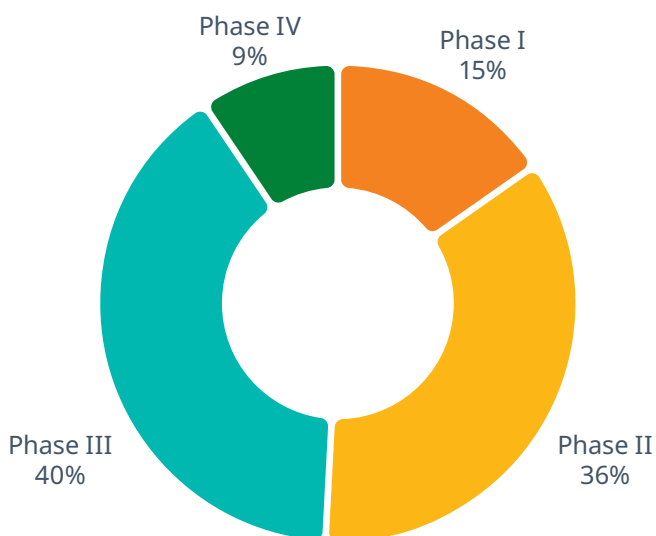

AMERICAS, EUROPE, ASIA PACIFIC OPERATIONS

14 FDA APPROVALS

Experience by Phase

Our therapeutically trained teams have conducted more than 200 dermatology studies in the past five years.

THE IQVIA BIOTECH ADVANTAGE

IQVIA Biotech is completely dedicated to supporting biotech companies with the hands-on expertise of a therapeutically aligned specialty provider. Fully leveraging the power of the IQVIA CORE™, we offer flexible solutions from development planning through commercialization.
